

**Message from Nikki Lucas, Partners Health Operations Manager & Gamston Medical Centre Practice Manager**

As you can imagine we are all a bit snowed under at the moment. All sites have moved or are moving telephone triage and booking of routine appointments has virtually stopped. We are attempting reduce the footfall through the practices as much as possible. Encouraging people to order prescriptions via on-line and then having them sent to their choice of pharmacy will help. If anyone is showing symptoms of COVID-19, please DO NOT attend your practice, A and E or pharmacy, stay at home and follow the 111 online advice.

Our teams are all working really hard with dwindling numbers of staff! All sites are currently operating as normal, apart from Gamston Medical Centre who will move to reduced hours 9am to 5pm from tomorrow (25 March 2020) due to staff shortage.

PartnersHealth LLP was formed on 2nd October 2015 by the GP Partners of the General Practices in Rushcliffe in recognition and response to the changing NHS landscape. It is constituted as a membership organisation, a partnership of partnerships.
